

## SE 557 Memosens pH Sensor

For special requirements and high-precision measurements with refillable liquid electrolyte, digital, with Memosens technology

Elimination of typical junction problems resulting in high measurement accuracy in ultrapure water as well as in heavily polluted media and at high temperatures. Integrated, refillable liquid electrolyte reservoir. 2 ceramic junctions, self cleaning due to pressurization (continuous outflow of electrolyte).

### Applications

Boiler feed water, water for injection (WFI), semiconductor production, difficult process media requiring high measurement stability
